### **Feedback Control Theory - University of Toronto**

Feedback occurs when outputs of a system are routed back as inputs as part of a chain of cause-and-effect that forms a circuit or loop. The system can then be said to feed back into itself.

### **Feedback - Wikipedia**

Control theory in control systems engineering is a subfield of mathematics that deals with the control of continuously operating dynamical systems in engineered processes and machines.

Network management has become challenging, requiring automated mechanisms to detect traffic behaviour, which may affect the networks' availability and reliability. Thus, a traffic characterization, called digital signature of network segment using flow analysis, is accomplished. The models used for
