Health and Safety Executive Case study: Scottish Power

A chemical property is any of a material's properties that becomes evident during, or after, a chemical reaction; that is, any quality that can be established only by changing a substance's chemical identity. Simply speaking, chemical properties cannot be determined just by viewing or touching the substance; the substance's internal structure ...

Chemical property - Wikipedia

4 Unit 13 industrial chemistry 13.1 factors affecting the location of a chemical plant and the spreading of contaminants through the soil and into water courses.
