

the alphas return pdf

Alpha is a measure of the active return on an investment, the performance of that investment compared with a suitable market index. An alpha of 1% means the investment's return on investment over a selected period of time was 1% better than the market during that same period; a negative alpha means the investment underperformed the market.

Alpha (finance) - Wikipedia

Weaknesses o In some cases, a negative alpha can result from the expenses that are present in the fund figures but are not present in the figures of the comparison index.

Ratios which Investors should consider while choosing

2 ESG in Equities When considering a regional equity investment perspective, we find a variety of different performance results when comparing MSCI ESG indices vs. their traditional MSCI benchmark sisters.

ESG in Equities - risklab

The result? In a world where hypergamy is high (right screen), the society's resources are almost completely annihilated, as men allocate most of their assets to consumption in a sad attempt to satisfy choosy women (resulting also in overpopulation).
